A spacious apartment in the city center, near to the Faculty of Economics and the park. Close to public transport stations and numerous shops with commercial content. The building is pre-war, without an elevator, while the apartment itself is a superstructure on the last, fourth floor. The plan is to install an elevator at the back, opposite the street. Spacious and bright, two-side oriented apartment of functional structure, so it is also suitable for business activities. It consists of an entrance area that leads directly to a large living room, and further to two rooms. One overlooks the inner courtyard, while the other is equipped with a built-in wardrobe and continues to the bathroom with a bathtub and a third, connected room. This room leads to the entrance hall where the guest toilet is opposite the separate kitchen. Therefore, all rooms in the apartment are mutually connected in a circular shape. The apartment is without furniture, except for built-in wardrobes and an excellent modern new kitchen with all the elements and appliances. The tenants of the building have their own parking lot in the inner yard, which will soon be closed by a ramp, so there will be at disposal two to three parking spaces.
